Governing Body Quality Report Part 1

September 2021

Quality updates and escalations from the July 2021 Quality, Performance and Finance Committee (QPF)

Quality risks and issues are reviewed in detail at each of the local area quality committees. Following local area scrutiny, key areas requiring escalation to the Quality, Performance and Finance Committee (QPF) are agreed and a summary report with detailed appendices are provided to the QPF.

The purpose of this report is to provide a high level summary of the key quality risks and issues for escalation to the Hampshire, Southampton and Isle of Wight Clinical Commissioning Group (HSI CCG) Governing Body from the July 2021 Quality, Performance and Finance Committee (QPF). It also provides the CQC ratings for the acute, community and mental health Trusts, care homes and GP Practices in our area.

- **Emergency Department (ED) performance and impact on quality:**
 - the constitutional standard which requires 95% of patients to be seen in ED within 4 hours is not being met across the CCG. At the end of July performance was 80.4%. The quality team liaise closely with performance and commissioning colleagues as it is known that delays in ED can affect patient safety and experience
 - providers within HSIOW continue to utilise the ED Patient Safety checklist which supports clinical processes and prevents unrecognised patient deterioration. Those providers undertaking regular checklist audits share their compliance with the CCG quality leads along with any actions for areas requiring improvement
 - patient feedback is reviewed regularly by providers and commissioners, in some areas ED feedback response rates are low and so providers are implementing actions to improve this, such as utilising an SMS survey and personally handing out feedback cards
 - quality leads from the CCG undertake deep dives into ED quality in response to their performance, no serious concerns have been escalated.
- **Planned Care long waits:**
 - the number of patients waiting for treatment across HSIOW is rising, despite staying stable during the pandemic due to a drop off in referral levels
 - a HSIOW harm review process was developed for use across the Referral to Treatment (RTT) pathway and is being used by three of the acute providers with the remaining provider developing systems to embed it. Any learning from the reviews is shared across the system.
- **Hampshire Child and Adolescent Mental Health Services:**
 - the number of young people waiting for assessment in the Hampshire CAMHS team has been increasing
 - all cases are reviewed regularly on the treatment pathway
 - support is available for young people, parents, carers and professionals via a CAMHS website and offers information about processing referrals, treatment times and sign-posting to useful resources.

Quality updates and escalations from the July 2021 Quality, Performance and Finance Committee (QPF)

• **Publication of Care Home Death Data:**

- on 21 July 2021, the Care Quality Commission (CQC) published a summary of all care home resident deaths involving COVID-19 notified to the CQC between 10 April 2020 and 31 March 2021. The report can be accessed via: [Care Quality Commission publishes data showing death notifications involving COVID-19 received from individual care homes | Care Quality Commission \(cqc.org.uk\)](https://www.cqc.org.uk/publications-reports/cqc-publishes-data-showing-death-notifications-involving-covid-19-received-from-individual-care-homes)
- the care home sector has been particularly affected by the pandemic and every death is a personal tragedy for individuals and families and the staff caring for them
- the published data reflects total numbers of deaths in residents but does not provide any context (for example, the occupancy of the home or the age and complexity of the resident's needs). Care should, therefore, be taken in interpreting the data as a higher number of deaths does not necessarily equate to any failure in infection control measures or quality standards
- from a quality perspective, since the start of the pandemic, the CCG quality teams have worked with care homes to support the implementation of all government guidance in relation to COVID-19 as it has become available. This has included the use of personal protective equipment, hand hygiene, social distancing, regular staff and resident COVID testing and vaccination.
